

# K.LASER®

## Social Media Launch Videos

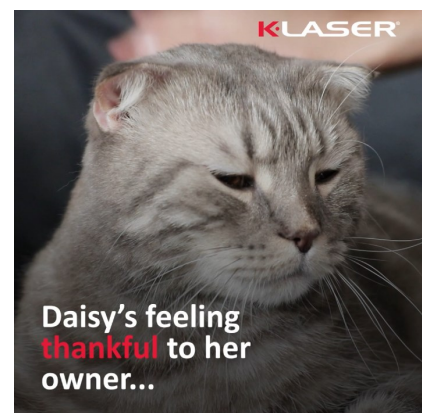

Social Media is simply the best and most economic way your vet practice can advertise its K-LASER service to new and existing clients. To help practices get off to a flying start VBS has produced a series of six short videos that can be posted onto Facebook and other social media platforms allowing you to start engaging with clients.

**Video 1:** Announcement of new K-LASER service available in practice.

**Video 2:** Mobility and Pain Management

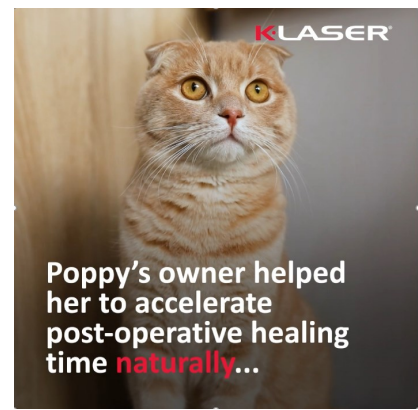

**Video 3:** Wounds and Dermatological conditions

**Video 4:** Joints and Mobility

**Video 5:** Painful Smelly Ears

**Video 6:** Post-operative healing

View a demonstration of these videos here: <https://klaser.co.uk/launchvideos>

Once ordered we will provide you with a separate link allowing you to gain access the downloadable versions of these videos. Clients may share videos on their own practice website, or social media streams.

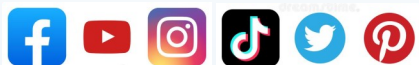

**Video Package: £150 + VAT**

To order call 0845 528 0336 or email [sales@vbsdirect.co.uk](mailto:sales@vbsdirect.co.uk)

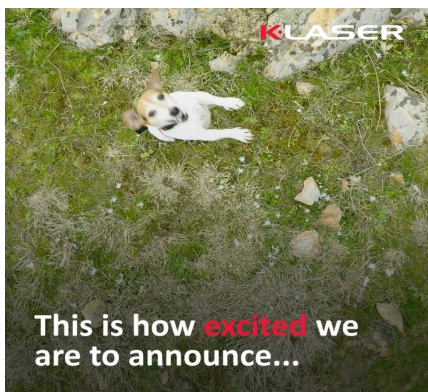

## Example Social Media Posts

When uploading your videos to social media platforms always include a post which provides further details about the service and also an action point, such as “contact reception for further information”. If you plan to offer a discounted or a free trial session also include the details here or provide a link to your website where the offer is further detailed.

ABC Vet Practice

ABC Vets are delighted to announce that we now offer K-LASEER laser therapy to our clients. K-LASER can assist a huge variety of complaints for dogs, cats, small furriers and exotic pets. To find out more contact the surgery on 01234 678910. We are offering half-price introduction sessions in June & July.

ABC Vet Practice

Does your dog suffer with joint pain, Osteoarthritis, hip or back problems? Do they have difficulty in walking, jumping or coping with steps/stairs?

Talk to our dedicated team of vets, nurses and rehab specialists, to help diagnose the real problem and see if K-Laser Therapy can help.

ABC Vet Practice

K Laser is an advanced non-invasive, relaxing treatment to aid the control of pain, inflammation and speed up the healing process of a variety of acute and chronic conditions.

The specific red and infrared wavelengths of light energy penetrate the body in a short treatment session providing relief and support in an accumulative way to maintain and prolong a good quality of life. This treatment can be used alongside other therapies and management techniques.

If you are interested to learn more and see if your pet can benefit - please speak to reception and book a consultation today!
